

HUBEN K1 .25 CAL.

- The Huben K1 is, without doubt, the most powerful semi-automatic bullpup on the market. A marvel of engineering and technology, its patented hammerless platform makes the K1 very different from any other PCP. It is able to achieve a very high rate of fire making the most out of its high capacity 17 round mag. The hammerless system is 100% mechanical and provides numerous advantages: high efficiency, zero vibrations, accuracy, and a wide variable power range.
- The Huben K1 was originally designed to shoot accurately at extreme power levels, with long range shooting and hunting in mind. However, the last version of the K1 has become a more flexible design, becoming an accurate gun at any power level. SUB-MOA at 100 meters
- The Huben K1 features a very ergonomic black stock made of hardy synthetic material able to withstand most extreme situations and environments (extreme temperatures, water, scratches, etc...)

Caliber	.25 (6.35mm)
Action System	Semi-Automatic, 17 round built-in magazine
Barrel	Rifled (unchoked)
Barrel Length	23.62"
Overall Length	32.4"
Cylinder Size	5000 psi
Front Sight	none
Rear Sight	none
Scopeable	Picatinny rail
Trigger	Two-stage adjustable
Working pressure	250bar ~ 80bar
Suggested for	Hunting
Thread	M18
Color	Black or Wood
Moderated	Internal 12 baffle shroud
Safety	Manual
Fixed/adj. power	Externally adjustable from 1700-3200 PSI (117-210 bar)
Function	Hammerless, semi-auto
Weight	3.5kg
Stock	Synthetic or Wood
